ECONOMIC GROWTH AND JOB OPPORTUNITIES IN NEWHAM

Newham is home to some of the largest and most spectacular developments in Europe. Investment in the borough's Arc of Opportunity includes Queen Elizabeth Park and Stratford, Canning Town and Custom House and the Royal Docks (including London's only Enterprise Zone). Newham is London's major regeneration prospect for the next 25 years.

Stratford's transformation is unique in London by virtue of the scale of ongoing development. The area will become the home of an additional 5,500 workers in 2018 when The Financial Conduct Authority and Transport for London relocate. In the coming years, a world class education and cultural district will be created on Queen Elizabeth Olympic Park which will bring together The Victoria and Albert Museum, The University of the

Arts London and University College London (UCL) to showcase exceptional art, dance, history, craft, science, technology and cutting edge design. The scheme is expected to deliver 3,000 jobs, 1.5 million additional visitors and £2.8 billion of economic value to Stratford and the surrounding area.

A new financial and business district will be created by ABP at The Royal Albert Dock. This unique £1.7 billion project will form the headquarters of Chinese and other Asian companies allowing them to reach new markets across Europe. It will strengthen trade links between east and west, and attract companies from the UK seeking to do business with Asia as well as connect across Europe. The first businesses will be in place by 2018 and the whole development will create up to

30,000 jobs when it is completed over a ten year period.

The immense scale of regeneration and development is not only about establishing Newham as a key player on the global stage, it is about securing long term growth and prosperity for future generations. By 2027, £22 billion will have been invested in Newham, creating more than 37,500 new homes and 100,000 new jobs. The council is committed to ensuring regeneration translates into economic and social opportunities for Newham residents. We expect to see job opportunities created across a range of sectors including: construction; digital & creative; retail & hospitality; business & finance; health & social care; green infrastructure & the environmental sector.

ALL ROUTES AHEAD: HOW TO GET TO THE CAREER YOU WANT

Here is some advice to help you plan your next move after Year 11. Remember: whatever your first choice, make sure you have a back-up plan.

If you are in Year 11, you will need to continue in education or training until at least your 18th birthday.

Studying a course until you are 18 will give you the best chance of developing the skills and gaining the knowledge that employers and universities want.

There are different options for you to choose from at age 16. You can study A levels in sixth forms or at college, take up an apprenticeship or traineeship, or study part-time and combine your study with work or volunteering for more than 20 hours per week.

Can I work full-time?

You will still be able to work full-time (more than 20 hours a week) if you want to, or volunteer or even set up your own business. But you will also need to make time to undertake part-time training or study in order to meet the duty to participate – this will allow you to get accredited qualifications.

What do I need to do?

Start thinking about the type of learning or training you need to get you where you want to be in the future. From the age of 14, you will have more choice about which route you would like to follow. This includes more traditional pathways like GCSEs and A levels, applied or technical qualifications and training. Your teachers or the careers adviser at your school or college can help you decide what suits you best.

Find out when your 15billion-ebp careers adviser is visiting your school so you can book an appointment to speak with them.

For more information on 15billion-ebp, please visit www.15billionebp.org

Full-time education

Do you want to study with other 16 to 19-year-olds at a sixth form college? Maybe you would prefer to study at a further education college where there are also older students around. Or how about a sixth form based at a school? You can find information about Newham learning centres in this brochure.

There are many different courses at a variety of levels. Your options will depend on your interests, strengths and Year 11 results. If you enjoy studying, do well at exams and are predicted to achieve mainly GCSEs at Grade 5 or above (formerly A*-B) then AS/A levels could be right for you.

If you are interested in learning about a general career area but are not yet ready to learn about a specific job, then an applied course could be for you. Applied qualifications are Level 3 courses for 16 to 19-year-olds that teach transferable skills. They are for students that want to continue their education through learning applied to a general job area e.g. business administration, health & social care,

performing arts, arts, crafts, media & publishing. If you are interested in training for a specific job role, there are technical qualifications available at all levels such as ILEX (legal work), AAT (accounts) and IMI (motor industry). Apprenticeships also include opportunities to study for technical qualifications.

Apprenticeships

If you are ready to start your career immediately, an apprenticeship will provide you with a job that offers training as well. You can apply through training providers and directly to employers.

You will need to be chosen by an employer after an interview and possibly an assessment test. You will receive payment of a minimum of £3.50 per hour as well as having the opportunity to gain qualifications.

If you need more qualifications or experience before starting an apprenticeship, then you might wish to consider a traineeship.

Frequently asked questions (FAQs)

I need help deciding what I should do. Where do I even start?

The first thing you need to do is not worry! Careers advisers in your school or college have a broad knowledge of all the options. Based on your talents and individual needs, they will be able to help you make the best decision for you. Most of the learning centres in this brochure have course advisers who will be happy to talk to you. Please contact the centre directly to find out more.

For more information on specific careers and the qualifications and skills needed for them, visit the National Careers Service website.

I know exactly what I want to do.

How do I apply?

You need to check the application information and any deadlines on your chosen learning centre's website/s. Make sure that you complete the application fully and obtain references from your school. Your school will then advise you about submitting applications.

What happens next?

If you meet the requirements for your chosen course

and it is not oversubscribed, you will be offered a place. You may be asked to come in to discuss your application further. You will be able to ask questions and get advice to help you make the best choice for your future. If you are successful in your application, you will need to enrol formally in August or September 2018. All offers of places are made subject to availability and are sometimes subject to you achieving your predicted grades. If you do not achieve your predicted grades, get in touch with the college or learning centre as soon as possible to see if they will still accept you on the course or have another option available.

Late enrolments – it may not be too late!

The earlier you apply, the more options you will have. However, if you've missed the enrolment date, there may still be a chance to get a place on a course. Enrolments generally continue for two weeks after the start of the course, and this can be extended in some cases. The best thing to do is contact the learning centre to find out more.

Where do Newham's young people go?

Abdullah attended Brampton Manor Academy and went on to achieve a Level 3 BTEC extended diploma in mechanical engineering triple distinction star (D*D*D*) at NewVlc Sixth Form College. Abdullah is now studying mechanical engineering at Brunel University.

Elizabeth attended The Cumberland School and went on to study at NewVlc Sixth Form College achieving A levels in; English language and literature (A*), history (B), philosophy (A) and an AS-level in psychology (B). Elizabeth is now studying social anthropology at London School of Economics and Political Science (LSE).

Kainatt attended Plashet School and is now studying for a Level 2 qualification in app development for smart digital technologies, at the Samsung Digital Academy at Newham College.

INFORMATION

for young people with special educational needs and disabilities (SEND), and for those helping them

Leaving school to start the next stage of your life is very exciting, but it can also be an anxious time when careful decisions and choices have to be made that help you to fulfil your dreams and aspirations.

You will be thinking about the future and what you would really like to do. You will need to look into which courses or training are available and if you have a physical disability, a learning disability or perhaps both, you will also want to know about student support services that will enable you to get on with your learning.

What do I do next?

1 Once you have found a course that is of interest, you can find out more by contacting the college, sixth form or other learning provider to arrange a visit. You will find contact details in this directory. Explain that you need to know about student support services and ask if you can meet the course tutor and someone from Student Support Services.

2 When you visit remember that this is your opportunity to find out about the course and for the course tutor to find out about you. The course tutor will know the course well and be able to offer you their best

advice. It is important to listen carefully; you are making an important decision and it has to be the right one for you now and for your future plans.

3 When you speak to Student Support Services or the course tutor, explain the support that you have had in the past and how this has helped you with your studies. Let them know if you have a statement of special educational needs and disability (SEND), or an Education, Health and Care plan (EHC plan).

Some good advice

- Advice and guidance is very important. There are people available to help you in school. It is really important to work with them.
- Listen to the course tutors that you will meet. If for some reason it is felt that the course is not the right one for you, do not be too disappointed. This happens to everyone at some time and it is very important that you start the right course.

- Whatever you choose to study, remember that it does not matter if your learning takes small steps or larger ones, what matters is that you are working towards what you would like to do in the future, remembering that along the way we sometimes do change our mind about what that is!

- You are used to being at school for five days every week and you may now find that some courses or training are for only one, two or three days. Try not to let that worry you or those close to you. Your spare days are an opportunity to do something else that interests you which could be another course at the same place or even somewhere else. Speak to the people who are helping you for advice and guidance.

- Lastly, enjoy yourself and your learning.

WHAT LEVEL IS RIGHT FOR ME?

If you don't achieve a minimum of a Grade 4 at GCSE or a Level 2 pass in Functional Skills in maths and English by age 16, you will need to continue studying maths and/or English as part of your post-16 study programme.

What level is right for me?

What's my current level/predicted grades?

5 or more GCSEs at grade 4 or above (previously A*-C) including English and maths

What education or training courses can I study?

A Levels
BTEC Level 3 Diploma or Extended Diploma or other Level 3 vocational course
Advanced Apprenticeship

What can I do after I complete the course?

Progress to university, a Higher (degree level) Apprenticeship or employment

GCSEs at mainly Grade 4 or below (previously C or below) English and/or maths at Grade 4 or below

BTEC Level 2 or 3 Certificate, Subsidiary Diploma or other vocational Level 2 course + Maths and English (often one year programmes)

Progress to a substantive Level 3 course, an Advanced Apprenticeship or employment

GCSEs at Grade 3 or below (previously D or below). English and /or maths at Grade 4 or below, or Functional Skills Level 1

BTEC Level 2 Certificate or other vocational Level 2 course + maths and English (often one year programmes)

Progress to a Level 3 course, a traineeship, an Intermediate Apprenticeship or employment

No GCSE, BTEC or other Level 2 passes

Foundation programme or pre-apprenticeship including maths and English (one year or less)

Progress to a Level 2 course, pre-apprenticeship course, a traineeship, or employment

There will be specific entry requirements for individual subjects and courses, and some subjects have higher entry requirements than others

TRAINEESHIPS

What is a traineeship?

A traineeship is real work experience with training that focuses on giving young people the skills and experience employers are looking for. At its core is work preparation training, English and maths for those who need it, and a high quality work experience placement. Traineeships last anything from six weeks to a maximum of six months. The content is tailored to your individual needs, and includes:

- **Work preparation training which ensures you are ready and have the confidence to take the first step in your career, such as an apprenticeship.**
- **English and maths support to help give you the literacy and numeracy skills needed for the workplace.**
- **A meaningful work experience placement which provides insight and experience of the world of work.**

What are the benefits of a traineeship?

- A traineeship will put you in a better position to compete for an apprenticeship or other job.
- It offers the opportunity to build your CV and get vital experience with local and national employers.
- Improving your English and maths skills will boost your chances of getting a job, as well as improving your long-term prospects and your earning potential over your lifetime.
- Employers are at the centre of traineeships to ensure they give you the skills you need to secure a job and succeed in employment.
- At the end of the work experience placement, you'll get a job interview with the company if a role becomes available, or a reference and an exit interview.

Will I be paid?

Work experience placements are unpaid, but employers are encouraged to support expenses such as transport and meals. Depending on your circumstances, you may be able to access financial support from your training provider, through the 16-19 Bursary Fund or the 19+ Discretionary Learner Support Fund. All training costs are funded by the government.

Is a traineeship right for me?

Traineeships are an ideal opportunity for young people who are motivated to get a job if they lack the skills and experience that employers are looking for. If you have been unsuccessfully applying for apprenticeships due to a lack of skills and experience, then you might be a good candidate for a traineeship.

You could be suitable for a traineeship if you are:

- **aged 16-18 and are qualified below Level 3**

- **unemployed (or work less than 16 hours per week) and have little work experience**
- **are motivated to work.**

How do I find a traineeship?

Traineeship opportunities will be advertised regularly on the National Apprenticeship Service website.

If you are in receipt of benefits, you should speak to your individual Jobcentre Plus adviser.

For more information about traineeships visit www.gov.uk/find-traineeship

"Traineeships are a great opportunity for both parties.

Not only can the employer get to know the trainee but the trainee can get real exposure to the type of career that is available and make an informed decision that is best for them."

*Chris Starling,
Head of Apprenticeships,
Virgin Media*

"My traineeship has given me the chance to improve my technical skills and show my determination to succeed. The support I have received has been brilliant, with regular reviews and updates on my progress."

Jake completed a traineeship with Virgin Media and has now progressed to an intermediate apprenticeship.

"I started the traineeship course a shy and quietly spoken person who lacked the skills, qualifications and confidence to get a childcare apprenticeship. Now, six months on, I have achieved my maths and English qualifications, have gained lots of work experience and have started my childcare apprenticeship. I have made lots of new friends, learned lots of new skills and I now have so much more confidence! I feel really proud of myself and what I have achieved. I love my childcare apprenticeship and look forward to progressing on to Level 3 next year."

Ruksana - Skills for Growth

APPRENTICESHIPS

Apprenticeships give you the opportunity to work for a real employer alongside experienced staff. You will earn a salary and gain qualifications as well as valuable workplace experience and relevant job-specific skills.

Zavier, Trainee Site Engineer, Balfour Beatty

"Studying a level 3 qualification in construction and the built environment was the ideal way to kick-start my career into a profession where there are huge opportunities and insufficient skilled and experienced people. The apprenticeship gives me the best of both worlds - experience and qualifications."

Apprenticeships take between one and four years to complete and cover more than 1,500 job roles in a wide range of industries, from engineering to financial advice, veterinary nursing to accountancy. The Government is committed to increasing the number of apprenticeships in the UK over the next few years, so there has never been a better time to get involved.

What types of apprenticeship are there?

Depending on your current skills and qualifications 16-18 year olds can apply for:

- Intermediate Level
- Apprenticeship (Level 2)
- Advanced Level Apprenticeship (Level 3)

Apprentices' opportunities for career progression are increasing with the expansion of higher apprenticeships at Level 4 or above. More of these specialised and highly skilled apprenticeships, which are equivalent to degrees, are being offered each year.

How old do you have to be?

Anyone living in England aged 16 and over who is not in full-time education can apply to be an apprentice. If you feel you are not ready for an apprenticeship yet, you may want to try a traineeship.

How much do you get paid?

The minimum wage for apprentices is £3.50 per hour, but many employers pay more than this. The average gross weekly wage for an apprentice is £210. This is dependent on the sector, region and apprenticeship level. Your employment will normally be a minimum of 30 hours per week.

Training

During your time as an apprentice you will receive training to enable you to gain nationally recognised qualifications which will help advance you in your chosen career. Apprenticeships are designed with the help of employers, so they offer a structured programme that takes you through the skills you need to do a job well.

Gintare, Rail project Co-ordinator, Mace

"The apprenticeship gave me a really good start to a career with great prospects. Following my apprenticeship in business administration, I secured my current job as I had developed a firm foundation in office administration. Practical experience together with the underpinning skills provided by my apprenticeship has been a great route into a career in project management."

Ismaeel, Trainee Accountant, London Borough of Newham

"I saw the apprenticeship programme as a great alternative to university. It provided me with an option to train while learning and was an opportunity to professionally practice accountancy principles in a working environment which helped me to develop into an effective trainee accountant."

Searching for apprenticeship vacancies

If you are in Year 11 and interested in an apprenticeship, search for vacancies by visiting www.gov.uk/apply-apprenticeship.

For information and guidance visit www.findapprenticeship.service.gov.uk/apprenticeshipsearch where you can download:

- How to write a winning apprenticeship application
- Progress your career with higher apprenticeships
- Apprenticeship support guide

If you want to find out more about apprenticeship opportunities and training you can contact local apprenticeship training providers.

Newham College
www.newham.ac.uk/apprenticeships

Skills for Growth
www.skillsforgrowth.org.uk/apprenticeships

Building Crafts College
www.thebcc.ac.uk/apprenticeships

You can talk to your school careers adviser about apprenticeships and they will help you with your application.

What's on offer?

Large, multi-national organisations to medium and small enterprises offer apprenticeships in a variety of sectors, including:

- Retail and commercial enterprise
- Construction, planning and the built environment
- Engineering and manufacturing technologies
- Leisure, travel and tourism
- Art, media and publishing
- Business, administration and law
- Information and communication technology
- Health, public services and care
- Education and training.

Afifa, HR Apprentice, London Legacy Development Corporation

"The apprenticeship gave me the perfect opportunity to get into an area of work which has a bright future and great opportunities for career progression. I am learning on the job whilst getting paid and securing a qualification which is very relevant to the job that I am doing."

Other benefits

Did you know that apprentices are entitled to an NUS card? This is issued through the National Union of Students and gives you discounts at a number of retailers and services. You may also be entitled to apply for an Apprenticeship Oyster Travelcard, which allows you to claim up to 30% off adult travelcards and bus and tram season tickets.

Leanne, formerly a student at Royal Docks Community School

"I've wanted to work in construction ever since I was little, just like my dad. Having an apprenticeship gives you the opportunity to gain experience and stay in education." After completing her apprenticeship, Leanne was employed directly by BAM Nuttall to work on the high-profile Crossrail project in Farringdon.

FEES AND FINANCE GUIDANCE £

If you are under 19 and have been resident in the UK for three years or more, full-time further education fees are FREE (this is subject to eligibility and status). Fees will be charged for commercial or higher education courses, and international students have to pay fees on all courses.

While you may not have to pay tuition fees, you might have other expenses to consider such as exam fees and the cost of materials for your course.

16-19 bursary fund

You could get a bursary to help with education-related costs if you are aged 16 to 19 and:

- **studying at school or college (not university) in England**
- **on a training course, including unpaid apprenticeships.**

Students most in need may be eligible to receive a bursary of £1,200 a year. This group includes young people who are:

- **in care or have recently left local authority care**
- **receiving income support**
- **disabled and receive an**

Employment and Support Allowance (ESA), and either Disability Living Allowance (DLA) or a Personal Independence Payment (PIP) in their name.

Discretionary bursary

Other students facing genuine financial difficulties may be awarded a bursary to help with the costs of travel, books or equipment. Bursaries may also be paid in kind.

Bursaries are paid on achievement of criteria such as attendance, punctuality and progress. Education and training providers decide on a student's eligibility for bursaries; they also administer the bursaries and payments.

If you need financial support, speak to your student support service or tutor to find out more, or visit the 16-19 bursary fund website www.gov.uk/1619-bursary-fund

Care to Learn – Help with childcare while you learn

Care to Learn is available to young people under the age of 20 who have one or more children and participate in learning and training

(not in employment), on a publicly funded course in England. If you live in London you may be awarded up to £175 per child per week to assist with childcare costs. For more information, please visit www.gov.uk/care-to-learn

Other awards and allowances

You could get a Dance and Drama Award (DaDA) to help with fees and living costs at one of 19 private dance and drama schools. Contact the school you want to go to and tell them you want to apply for a DaDA. You must be 16 or over and show talent and a likelihood to succeed in the industry.

If you are gifted and talented in specific subjects, such as sports, music and art, there are charitable organisations who you could apply to for funding. Information on such organisations is listed at public libraries, or you can speak to a careers adviser.

"Brampton Manor Academy Sixth Form has, within a very short time, established itself as a high achieving A level provider in the region. We offer only academic A levels and provide excellent teaching and guidance that enables the vast majority of our students to progress to the most prestigious Russell Group universities in the UK. If you've got a dream, we'll help make it a reality."

*Dr Dayo Olukoshi,
Executive Principal*

Brampton Manor Academy Sixth Form offers distinctive, academic provision within Newham. We deliver a rich programme of A Level teaching in a wide range of subjects for students who aspire to achieve the high grades required for admission to the UK's top universities. Brampton Manor Academy is a highly successful school, having been rated by Ofsted as "Outstanding" in all areas.

Our amazing 2016 AS/A2 results is an indication of the quality

of our teachers, many of whom are Oxbridge and Russell Group graduates and will leave no stone unturned in ensuring that you succeed.

We offer excellent curriculum resources with top quality accommodation in all curriculum areas, all fully resourced with the learning materials and equipment needed for outstanding teaching and learning.

Further, we provide a bespoke programme of extracurricular activities, ranging from rowing to debating, to enrich your personal development. Many of our students attend summer schools with leading universities, including Oxford, Cambridge, Bristol and UCL. All students undertake work experience in a field of their choice in the summer term.

Our sixth form is academically selective and students are taught in average class sizes of 20. Sixth form teaching takes place in our dedicated 6th form centre

comprising of 25 teaching rooms, a large study centre and a large student common room with cafeteria. The centre has its own outdoor area with picnic tables and our sixth formers have priority use of the adjacent tennis courts, cricket nets and other sports facilities.

We offer you our track record as a school:

→ Our 2016 Russell Group progression rate is 88%, with students going to great universities like LSE, UCL, Imperial, Warwick, Bristol and Durham.

→ Our students achieved fantastic results at A level in 2016 with progress score +0.68; average grade of B+. A large number of students achieved straight A*/A grades.

→ We are in the top 1% of schools in the country for student progress from KS2-KS4.

→ Ten of our students are progressing to Oxford and Cambridge Universities to study highly competitive courses like medicine, maths and economics.

We offer you academic success and the opportunity to develop the skills and qualities needed for university admissions alongside first class UCAS guidance provided by our dedicated university access officers, who are graduates of Oxford and Cambridge universities. However, despite the high academic success you will achieve at Brampton, our most defining feature is the care and support we provide our students. We treat all students as individuals and do all we can to help you achieve success in whatever field you wish, enabling you to have an enjoyable and rewarding two years.

BUILDING CRAFTS COLLEGE

Subjects

Construction

"We pride ourselves on a welcoming and supportive atmosphere and as a small college, we are not too big for the individual."

Len Conway, Principal

Every student is placed under the direction of a nominated course tutor, who is responsible for all aspects on that individual's training and welfare. Other members of staff will support the learner in meeting individual's needs, but the nominated tutor combines the traditional role of the master craftsman with that of a mentor, to advise and guide students at every stage of their development.

The college is essentially practically based. The majority of time spent in the workshop environment, whilst much of the theory and underpinning knowledge is imparted in small groups around the work bench. Lecture rooms, with modern IT and projection facilities, are used for more structured, theoretical instruction, with a library also available as a quiet room for personal study. All students have access to the college computer system for course work and the compilation of portfolios for assessment purposes.

The college is fully committed to providing equality of opportunity

Level 3	BTEC	Vocational	Advanced Apprenticeships
Level 2	BTEC	Vocational	Intermediate Apprenticeships
Level 1	Multiskills programme		

Building Crafts College
Crafting Excellence

and celebrating difference. We strongly believe that all of our students are capable of progressing in their chosen subjects, to become a master craftsperson, a construction manager, or a technical expert in their field. When students enrol at the Building Crafts College, they become our learners regardless of their background or prior achievement. They receive our support and commitment to achieve their full potential.

Students can progress through our Level 1 courses in carpentry and joinery, construction or stonemasonry onto Level 2 and 3 courses in the same subjects. At age 18 you can progress on to full time programmes in fine woodwork and furniture making. Evening classes are available in woodwork, stonemasonry and wood carving. The Building Crafts College also offers a degree in historic building conservation.

CHOBHAM ACADEMY

Subjects

Business, economics and computing

English literature and modern foreign languages
- Spanish

Humanities

Performing arts

Sports

Science and mathematics

"Our sixth form students have achieved amazing successes since we opened; we are all immensely proud of them."

Rebecca Hickey, Principal

Life in the sixth form is a very special time for students for many reasons. The core values of Chobham Academy, namely excellence, respect, integrity, innovation, collaboration, are mirrored within our sixth form; we combine the traditional values of excellent behaviour and smart attire with great teaching, academic excellence and the best of modern technology. Sixth-form students at Chobham Academy enjoy a dedicated ICT suite, study room and panoramic roof terrace.

Our sixth form is divided into two ambitious pathways: Sixth

Form Academia and Sixth Form Virtuoso. Sixth Form Academia features excellent academic tuition, including Russell Group and Oxbridge mentoring with links to a number of top universities, while Sixth Form Virtuoso prepares students for careers in the performing and creative arts with support from leading institutions such as the Royal Shakespeare Company and LAMDA. Virtuoso students make use of cutting-edge facilities, including a theatre and box office, dance studio, Mac suite and recording studio.

In the first three years since opening, our Academia students have enjoyed many notable successes as highlighted by our 2016 A level and destinations results:

What is it like to study here?

"No matter what subjects you're doing or what career pathway you want to follow, the teachers give you the support and opportunities that will allow you to follow your dreams." *Tracey*

- **Proportion of students studying an undergraduate degree at university - 79%.**
- **Proportion of students studying an undergraduate degree at a top 50 university - 41%.**
- **Many have secured places to study at the most prestigious universities in the country, including Imperial College London, UCL, the LSE and King's College London.**

Chobham Academy is part of the Harris Federation, which for the first time in 2015 established a bursary for gifted but disadvantaged students who have gained places at Russell Group Universities. In 2016, Chobham was included in the Harris Experience Advanced Years

12-13 Programme (HEA). HEA is a Russell Group application programme providing expert guidance and individually-tailored academic opportunities for our most able sixth formers.

In addition to these academic successes, our students have proven themselves to be outstanding entrepreneurs. In 2016, as part of our enrichment programme, a group of students took part in the Envision Community-Apprentice Pitching Challenge, successfully pitching their business plan for 'Hope for Homelessness', a charitable organisation aimed at tackling homelessness, to the board and the O2 Think Big initiative. Equally successful have been our Virtuoso students, delivering outstanding performances in our

third whole school production, 'We will rock you', Brechtiam's version of 1984 and an extremely hard hitting piece of theatre, 'Identity', which aimed to raise awareness about the dangers of human trafficking.

Chobham Academy, a Healthy School (Bronze award, 2017) was in June 2015 judged by Ofsted to be an 'Outstanding' school and the sixth form was also judged as 'Outstanding'. Ofsted wrote that "[sixth form students] benefit from an extensive range of highly effective teaching and learning opportunities. There are opportunities to complete high quality work placements and participate in a carefully planned personal development programme."

JOHN F KENNEDY SCHOOL

Subjects

- Functional skills
- Vocational skills
- World studies
- Independent living skills
- Sport and physical activity

Special Needs Academy

"At John F Kennedy school we offer a continuation of high quality learning for young people with complex learning needs."
Diane Rochford, Executive Headteacher

We offer a small allocation of post 16 places within our 4-19 school. Our post 16 provision is delivered at both our Beckton and Stratford campuses. The main focus of our curriculum is to develop communication skills and to support developing independence.

We offer structured teaching and learning approaches within our Autism Spectrum Condition

(ASC) provision, supported by symbolic communication strategies (the Picture Exchange Communication System – PECS). We offer a sensory based curriculum with all aspects of physical development and postural management in our

provision at Stratford for more complex learners.

We offer Preparation for Adulthood programmes such as ASDAN Towards Independence. We offer ASDAN qualifications, Entry Level 1 as well as ASDAN Life Skills Challenge. Our programme of study includes communication, literacy, numeracy, life skills including horticulture and vocational modules.

What is it like to study here?

"Like most parents who have a young man with Jono's needs we were very anxious about Jono's transition at 16 but there was very little problem.

"The truth is Jono has thrived at JFK; they got a handle on him so quickly and he's made real progress in all the ways you'd want him to academically, in communication and crucially for Jono in managing his emotions. He's learned amazing new skills like ice skating, gardening and, essentially for home, washing the dishes!"

"However when you have a young man like Jono who doesn't use words, you have to watch and observe carefully. This is what I see: every morning when the bus comes to take him to JFK he smiles and most nights when he comes through the door he is equally cheerful. JFK makes him happy; you have to ask yourself as a parent could you ask for more?" **Alison, parent of JFK pupil**

LONDON ACADEMY OF EXCELLENCE

London Academy of Excellence (LAE), named state sixth form of the year by The Sunday Times, is an academically-focused and high-achieving sixth form in Stratford, East London, located right next to the station and Queen Elizabeth Olympic Park.

Our core values of Excellence, Kindness, Respect, Humility, Independence and Resilience underpin all that we do. We are proud to be an inclusive community that promotes academic achievement, aspirational opportunities, enriching experiences and personal development: this is 'The LAE Experience'.

Academic achievement

Our students truly value working alongside likeminded peers who want to achieve and appreciate the productive and purposeful nature of life at LAE. We offer only the 'facilitating' A level subjects favoured by the top universities. In

2016, LAE ranked top 20 nationally for student progress resulting in half of all grades being A* or A, 97% A*-C.

Aspirational opportunities

No two students' experiences at LAE are the same – our tailored programmes of university visits, career-readiness workshops, work placements and mentoring ensures every student is prepared for their next steps. This rigorous preparation meant that, last year, a record-breaking 20 students received offers to study at Oxford and Cambridge colleges.

What is it like to study here?

"The support we receive from our teachers is incredible. I only saw Oxford and Cambridge as an impossible dream, but since joining LAE the idea of applying to the top universities has been 'normalised'." ***Reiss, now studying English literature at the University of Cambridge.***

Enriching experiences

We offer our students as many different life experiences as possible to help find out what is right for them. We believe this is so important that it is built into our weekly timetable. Every student participates in our weekly sports programme and we also offer a range of academic clubs and societies and the Duke of Edinburgh Award.

Personal development

Our close relationship with our partner independent schools enables LAE students to benefit from experiences they would never have expected. In addition, our House system, tutoring, outreach and volunteering opportunities are

character-building and will help you build a rich and varied CV too.

For more information and to book a place at one of our Open Days taking place in November, please visit: www.lae.ac.uk.

"An amazing thing is happening in East London. It's going to change thousands of young lives and give Britain the dynamic and creative workforce it so desperately needs. It's called LDE UTC and if you are 14+ and want to attend the tech school of the future...You need to know about it!"

Jason Bradbury, TV tech expert and LDE UTC governor

The London Design & Engineering University Technical College (LDE UTC) is a student-focused, high-tech school where academic excellence and employer partners create the next generation of

confident, independent, work-ready individuals.

We combine first class facilities and specialist equipment with outstanding staff. This provides

experiences that will equip students of LDE UTC with the skills they need to secure employment or routes into higher education.

The curriculum is delivered through interesting and exciting employer-led projects, enabling learning by doing. We make learning relevant and memorable, which boosts our students' academic achievement.

Every student receives expert careers advice from our university and employer partners, as well as access to mentoring, site visits and work placements. Through this you gain the opportunity to

secure either paid employment (through a traineeship or apprenticeship), or a place in higher education for which bursaries and scholarships are available.

Are you excited about the prospect of a career in design and engineering? If so, our practical and academic approach – combined with the strength of our employer partners – will give you the best possible start and launch your career.

"Newham College offers courses at almost every level, including degrees at our University Centre. We provide fantastic opportunities for students who aim to do their best. Relevant work experience is guaranteed and numerous students have even benefited from travelling abroad to do placements in the industries that interest them the most. There's no limit to achieving great things at Newham College; whatever your ambition, we can help you gain the skills for your success."

Paul Stephen, Newham College Principal and Chief Executive

#UnleashYourPotential

Newham College is one of the largest further education colleges in London. There are specialist facilities for learning, socialising and even keeping fit. Students are supported to ensure that learning and progression goes far beyond their studies. Our gyms and exercise classes are completely free – and free breakfasts are available from 8.15 - 8.45am.

The subjects that we offer range from engineering and construction to health and social care. We teach academic topics such as psychology and science and we offer specialist training for vocational careers,

Level 3	BTEC	Vocational	Advanced Apprenticeships
Level 2	BTEC	Vocational	Intermediate Apprenticeships & Traineeships
Level 1	BTEC	Vocational	Foundation/Pre-Apprenticeship programmes

What is it like to study here?

"This course has offered me all the knowledge in biology, chemistry and physics that I need, along with some practical skills, so I can continue my studies and choose a good university and career path. I'm planning to study biochemistry at university because I want to become a zoological scientist."

**Petru Christian Somodi,
Science Level 2**

in industries such as tailoring, hospitality and catering or motor vehicle engineering. Newham College is the starting point for achieving all your goals.

Newham College courses

Courses are provided free of charge for all 16-18 year olds along with free breakfast and lunch. The only costs you need to cover are exam fees, books and equipment. Our Learning Resource Centre offers books, DVDs and online resources to help students do research and complete assignments at no extra cost. Newham College is committed to pioneering opportunities for students to succeed. In partnership with Samsung, we have launched the Samsung Digital Academy, a centre of IT excellence where students

can learn in a state-of-the-art environment, with access to the latest Samsung devices.

We also run a fashion and tailoring centre of excellence, where lifelong careers are established, as a result of vital links between Newham College and leading employers.

This is just a fraction of what is available for those with the ambition to make the most of college in order to build a great career!

Free breakfast and lunch

Free breakfast is served on a daily basis to all students who arrive before 8.45am. Free lunch is also made available to students aged 16-18 and discounted travel is offered to minimise financial worries for all students in this age group.

Student life

Every student is encouraged to take part in a range of extra-curricular activities, where friendships can be built, new skills can be learned and even additional qualifications can be gained. Our students' union and enrichment teams can enable you to keep fit, have fun and accomplish achievements that you may never have imagined. Our students' union not only represents your interests, but also organises a range of enjoyable events throughout the year. There are student life areas at both of our campuses where you can relax and socialise.

NEWHAM COLLEGIATE SIXTH FORM CENTRE

Subjects
English literature
Humanities
Science and mathematics

"If you wish to study in a highly academic environment with teachers who will prepare you to progress to some of the most competitive universities in the UK or abroad then join us!"

Mr Mouhssin Ismail, Principal

Newham Collegiate Sixth Form Centre (the NCS) is the academic A level centre established by a group of Newham secondary schools: The Cumberland, Kingsford, Lister, Little Ilford, Plashet, Rokeby, Royal Docks, Sarah Bonnell and Stratford School Academy. The NCS primarily offers places to students from its partner schools and other schools in Newham and surrounding areas.

The NCS offers a focused A level curriculum for academic students, and the opportunity to study in a dedicated sixth form centre with high-quality facilities and a specialism in science and mathematics.

The ethos of the centre is to provide students with an academic education which also promotes self-development enabling and encouraging students to work hard and

stretch themselves to achieve their full potential.

The A level curriculum has a strong intellectual focus, and an emphasis on preparing students for progression to Russell Group universities including Oxbridge. The NCS also supports student application to highly competitive US Ivy League Universities. The expert staff team provide a stimulating education, personalised curriculum, and opportunities to develop wider knowledge and experience within a supportive environment.

The centre has excellent facilities for students including state of the art science laboratories and iPads for all students as a learning tool. The centre also includes a lecture

theatre, student library, quiet study centre, a student social centre and café.

Collegiate students will study four A levels in their first year, and attend classes for five hours per week in each subject. Each student has a personal tutor and every student's programme is individually designed to maximise study opportunities and prepare students for successful progression to leading universities or competitive internships. Students also undertake private study in the dedicated sixth form library and learning resource centre to develop their independence in preparation for university.

Students will benefit from the centre's bespoke Super Curriculum which is designed to stretch interests outside of core A level studies providing development as a deep thinker, critical enquirer and intellectual risk taker.

What is it like to study here?

"The most unique thing about the NCS is the academic buzz that you feel around here. It's palpable, you can feel it here. Every corridor you walk in there's a conversation that's about something interesting or something academic, and you don't get that at any other institution. It's amazing!"

Haseeb

An emerging talent programme gives students an insight into the careers of accountancy, banking, law, engineering, medicine and dentistry. The programme provides skills and knowledge through workshops with industry leaders, internships, work placements and mentoring from industry experts. A focused programme of preparation for university begins as soon as students start their Year 12 study. Students and staff work closely with leading universities to broaden students' understanding of different university including strategic partner UCL subjects to familiarise them with the range of degree courses offered, and to start to target degrees they are particularly interested in. At the end of Year 12, all students undertake specific preparation for applications and admissions to higher education, including Oxbridge and Russell Group

universities as well as scholarship applications to international universities. Students also receive assistance with entrance examinations e.g. BMAT, UKCAT, LNAT and STEP.

If you are predicted to achieve a set of impressive GCSE results, and you are interested in studying the subjects we offer, then Newham Collegiate Sixth Form Centre is an excellent place for your sixth form study.

NEWHAM TRAINING AND EDUCATION CENTRE (NEWTEC)

Subjects

- Early years (childcare)
- Supporting teaching and learning in schools
- Health and social care
- Business administration and customer service
- Award in ICT for early years
- Personal development and employability skills
- GCSE English and mathematics

"Live in your world – Learn in ours"

Pat Edwards, CEO

NEWTEC is a specialist organisation offering vocational training opportunities and seven high quality registered day care nursery facilities in Stratford and East London.

The learning programmes are highly responsive to learner and employer needs and offer excellent progression routes ranging from entry level to a Level 5 foundation degree in early years and early years leadership and management or Level 5 diploma in leadership for health and social care and children and young people's services.

Vocational

Learners aged 16 to 18 who are not already qualified at Level 3 or above will complete a traineeship programme for a minimum of six weeks at NEWTEC which includes:

- a work-experience placement in the health and social care or early years/childcare sector
- employability skills training (this includes CV writing, job search skills, confidence building, completing work-based activities whilst in your work-placement and mock interviews)
- Functional skills English, maths and ICT training. Upon successful completion of the

Level 3	Vocational	Study Programmes
Level 2	Vocational	Study Programmes & Traineeships
Level 1	Vocational	Traineeships and Study Programmes

traineeship programme, Level 1 learners can then progress to a Level 2 or Level 3 early years, childcare, teaching assistant, health and social care, customer service and business administration. Learners aged 16 to 18 who are on Level 2 or Level 3 study programmes work, towards English, maths and ICT if required. All programmes offer work placement opportunities for learners at Levels 2 and 3 via nurseries, playgroups, toddler groups, crèches, schools, adult care settings or business environments.

Vocational and qualifications include:

- Early years and childcare and health and social care
- Employability skills, customer service and business administration.

Higher Education include:

- Kingston University foundation degrees Levels 4 and 5 in early years and in early years leadership and management. The foundation degree provides an appropriate pathway for learners wanting to progress to a Level 6 'Top Up' degree.

NEWTEC has seven high quality registered nurseries that create strong links between education, training and employment. They generate valuable opportunities for learners to gain high-quality work experience as part of their courses and provide excellent progression opportunities into sustainable employment or further study. Childcare is a dynamic and growing sector with jobs at every level, you can end up being your own boss, running your own nursery and help to shape the lives of today's children as well as future generations.

NEWTEC Recruitment (Staffing Matters)

Staffing Matters provides both childcare and health and social care agency staff on demand for provisions who may be understaffed for various reasons. Registration is open to all young learners.

What is it like to study here?

"NEWTEC has been a fantastic place to study, I have gained so much knowledge and experience by completing my studies here. Before I came to NEWTEC, I had no prospects, goals or ambition. With the invaluable input from my teachers, I completed Levels 2 and 3 in childcare and there was a huge boost in my confidence. My parents noticed the difference in me and cheered me on. I applied for several universities and got into University of East London. NEWTEC has had a major influence on my education and changed me for the better. NEWTEC inspired me and I will always treasure the memories of attending this institution."

"NewVlc is a college with an excellent track record for successful student development and progression. We are a strong, supportive community organised around the needs of individual students and focused on helping everyone succeed."

Eddie Playfair, Principal

The 2017/18 academic year sees NewVlc celebrate 25 years of success as a post-16 provider. We are a thriving, diverse and friendly college located in the heart of east London. Since 1992, NewVlc has supported more than 50,000 students to achieve their goals. Our 2017 A level and vocational results show a 98% pass rate with 10% of all A level entries achieving an A* or A grade.

As one of London's largest sixth form colleges, with more than 2,500 students, we offer a very wide range of opportunities for learning and personal development. We get to know every student well and provide them with individual attention and support. Our focus is to provide students with everything they need to successfully progress to higher education or employment.

We equip young people with the knowledge and skills needed to stay safe and flourish in modern Britain.

In 2016, more than 696 students won places at university, with 86 of these progressing to Russell Group universities.

NewVlc offers a wide range of courses including more than 40 A level subjects, specialist Honours and Create Programmes, Level 2 and 3 vocational courses, and foundation level and ESOL courses. If you choose to join us, you will receive excellent teaching and support to achieve the success you deserve, and create the future you want. We will treat you with respect and challenge you academically - encouraging you to develop new ways of seeing and thinking.

Level 3	A Level	BTEC	Vocational
Level 2	BTEC	Vocational	GCSE
Level 1	BTEC	Vocational	Foundation programmes

Mughees heads for Cambridge

NewVIC Honours Programme student, Mughees Hassan, 18, landed an 'open offer' from the University of Cambridge in January. He had already achieved a coveted A* grade in his extended project when he received the offer from Cambridge for natural sciences.

Mughees says: "I have always had my sights set on Cambridge. I even moved to London from Ireland where my family live to ensure I had a better chance of getting in. I am part of the debating society, the chess club, maths club and I also play football at college. NewVIC has prepared me well for my future."

Mughees Hassan, honours programme student studying A levels in physics, chemistry, maths and further maths. Ambition: to become a researcher in quantum physics.

We expect you to become a skilled independent learner by adopting a mature approach to your studies - meeting deadlines and aiming for 100% attendance and punctuality.

At NewVIC we not only support and invest in your academic success, we also place a high value on your all-round development. One of the ways we do this is by providing an exciting, high quality and wide-ranging programme of student development and sports activities.

These activities will help you broaden your experience, develop your interests and passions, support your wellbeing and offer opportunities for fun, competition and skills development.

Our Nrich programme covers the creative arts, sports, leadership, enterprise, health awareness, language power, understanding our communities and our world. We run activities on a daily basis during lunchtimes, after college and on Wednesday afternoons.

Activities you can participate in include DJing, the debating club, the cricket, basketball and leadership academies, creative writing, street dance, model United Nations and health advocacy training. Student development activities are open to all students and participation can contribute towards your sixth form Bac.

We want all students to enjoy their time at NewVIC, to unlock their potential with our support, and to achieve their goals for successful progression to higher education or the world of work.

"Universities want thinkers. Employers seek problem solvers. So schools have to change. At Six 21 we offer a top academic education, and a lot more - incredible opportunities to develop into extraordinary individuals."

Peter Hyman, Executive Headteacher

"School 21 is an exciting place to learn. Outstanding leadership has produced a highly effective school in a short time. Excellent teaching across the school and in every subject allows all groups of pupils to

achieve equally well and rated "Outstanding" in all categories by Ofsted.

From School 21 comes a pioneering new sixth form, Six 21 which opened this September. Six 21 is a dynamic and exciting place for those with the ambition to go to top universities, find fulfilling careers and make a difference to the world.

Harnessing School 21's experienced team with a track record of developing exceptional students who are eloquent

speakers, skilled problem solvers and creative thinkers, at Six 21, we believe in the balanced development of Head (academics), Heart (empathy) and Hand (creating).

A unique programme of learning

We have created a bespoke programme for every student at Six 21, drawing upon an unrivalled network of organisations and opportunities that the school's founders and influential trustees have built up over the last five years.

- A levels taught by outstanding teachers employing the most advanced teaching techniques -

What is it like to study here?

"The thing about Six 21 is that they really do prepare you for the future. You learn how to speak, how to think, how to work with others and how to do amazing projects. And at the same time they help get you ready for top universities and careers."

Zakiya, Year 12

working in partnership with top universities (including King's College London and Oxford and Cambridge colleges).

- Research projects, in an academic area of your choice, making use of masterclasses from top university professors, to develop the confidence, independence, and creativity that enables success at university.
- Real-world learning - long term, ongoing placements with our network of partners: project internships in the fields of law, medicine, the arts, high tech businesses.
- Leadership development and service learning. The chance to make a difference, address challenges, and

campaign for change in your local community and internationally.

Are you ambitious, academic and enterprising? Do you want a sixth form experience that goes beyond the ordinary? If so, Six 21 could be the place for you.

SKILLS FOR GROWTH

Subjects

Business administration
Customer service
IT
Childcare
Maths
English
Work skills and employability
Sales
Supporting Teaching & Learning in Schools

"To develop the skills of individuals and communities to respond to the changing needs of a 21st century workforce."
Ashley McCaul, CEO

Skills for Growth is a well-established and well recognised charity that puts our learners at the heart of everything we strive to achieve. We offer apprenticeships, traineeships, work experience, qualifications and training to enhance the skill sets of young people in the community and to ensure that they can lead productive and independent lives. Skills for Growth helps young people start their career, equipping them with the skills and experiences that they need to progress into employment.

We provide a structured approach including both educational and pastoral support. We have a dedicated staff team to help you make the best choices.

What can I achieve?

Skills for Growth offers you the chance to grow and develop both new and existing skills including:

- qualifications in maths and English (if required) from Entry Level 2 up to Level 2
- vital employability skills and interview techniques
- NVQ Level 2 and 3 qualifications in business administration, customer service, IT, sales, supporting teaching and learning in schools, and childcare

Level 2	BTEC	Vocational	Intermediate Apprenticeships & Traineeships
Level 1	BTEC	Vocational	Foundation/Pre-Apprenticeship programmes

- valuable work experience in small and large businesses
- the opportunity to experience different vocational areas to make the best career decisions for your future

All our pre-apprenticeship programmes offer structured financial support and provide you with the skills to progress into a suitable apprenticeship. There are no formal entry requirements, as we can deliver all of the qualifications you need. You will be required to attend an assessment day where we will assess your work readiness as well as your maths and English levels.

You will need to demonstrate motivation and commitment to achieving your goals.

You will also meet with a Learner Services officer to discuss your skills, qualifications and work experience. You will then be formally offered an appropriate programme or apprenticeship. All our pre-apprenticeship programmes provide you with the skills, training, knowledge, individual coaching, work experience and support to progress you from our pre apprenticeship programmes onto a suitable apprenticeship or alternative career path.

What is it like to study here?

Adam found A levels quite stressful after achieving very positive GCSE results, and decided to look for a job. He soon found job hunting difficult without work experience, and came across Skills for Growth. Adam signed up on the traineeship course to gain much needed work experience.

During this time Adam learnt many new skills and increased in confidence.

On completing his traineeship Adam was keen to start an apprenticeship and was successfully recruited as a Level 2 business administration apprentice within the company. Adam works as a receptionist for our Stratford site, and is enjoying learning more each day and meeting new people. Within a few months of joining Adam became Employee of the Month, voted for by staff across all three London sites, for his positive attitude, friendliness and eagerness to help.

Adam Sheraz

This will ensure that you start a programme or apprenticeship that gives you the best opportunity to succeed.

If you would like to apply, please contact our Learner Services team on 020 8221 0500.

If you feel that you are ready to enter the world of work, Skills for Growth will be able to offer you excellent employment-based training, leading you to develop lifelong work-based skills.

"A very warm welcome to St. Angela's Ursuline Sixth Form as you consider the next stage of education in your aspirations for university and working life. Your choice of post-16 education in both the institution you choose and the courses you wish to study is one of the most important decisions you will make in your life. With £1.2 million of investment in a new sixth form centre and resources, St Angela's is the right place to take on the challenge of the biggest educational leap you will ever make and importantly it is with people who care about you."

Mark Johnson, Headteacher

St. Angela's Ursuline sixth form is situated in the heart of Forest Gate. We have an excellent, longstanding tradition of providing an outstanding education, filled with the excitement and challenge. We offer advanced and/or applied learning courses and a huge range of super enrichment opportunities. The mechanisms to ensure you are a holistic learner and the sixth form's outstanding support make our progression rates to university truly exceptional at 95%.

Our sixth form provision, for all boys and girls, offers a choice of A level courses, as well as BTEC health and social care, and the Extended Project Qualification. Our links to universities are well developed and superb including partnerships which provide unique opportunities, reduced offers and distinct scholarships. We also hold incredible networks to the world of work ultimately creating innovative opportunities for all students to grow as individuals as well as part of the very special community that is St Angela's sixth form.

What was it like to study here?

"Not only did I benefit from the great support we got in lessons, I was also amazed by the number of enrichment activities on offer."

Sam, now studying maths at Durham University

What was it like to study here?

"There is so much opportunity provided in the sixth form to set you on the right path for further education and life. Constant support and guidance is provided to motivate you towards success." **Sara, now studying medicine at Queen Mary University**

Computing
Economics
English literature
French
Geography
German
Government and politics
Graphic art
History
ICT
Media
Mathematics and further Mathematics
Physics
Product design (3D design)
Psychology
Sociology
Religious studies

"We get to know every one of our students individually and provide support to them every step of the way. We make sure parents are kept fully aware of their progress and our small class sizes of approximately 13 per class means we provide more personalised teaching. St Bonaventure's has all the advantages of a traditional 6th form with excellent mentoring and pastoral care."

Paul Halliwell, Headteacher

We teach traditional subjects that are highly rated by the most prestigious universities and we make sure that our students make exceptional progress. Our 6th form is co-educational and we provide an outstanding education to young men and women wishing

to study a variety of subjects, both academic and vocational.

Our results are consistently good and we have the best results in the country in the highly regarded humanities and social sciences. Our new 6th form building which opened in January 2017 is a dynamic centre for post-16 learning, supporting achievement, aspiration and progression.

Standards and expectations are very high at St Bonaventure's and we boast longstanding partnerships with successful academic institutions and employers. St Bonaventure's has a fantastic reputation on a local, national and international

level and many of our alumni have made positive impacts in many areas of society since we were founded in 1877.

Choose us if academic success is as important to you as it is to us.

What is it like to study here?

“Everyone has high expectations of you as St Bonaventure’s students go on to do amazing things.”

Zainab - former Plashet School pupil

“Teachers put so much effort into your education.”

Balqis - former Sarah Bonnell pupil

“The 6th form helps you reach your full potential by helping you use and manage your time wisely.”

Ruweyda Aydarus - former Lister School pupil

“I love the fact the 6th form is compassionate. They communicate and guide you effectively. Overall, the 6th form is almost like a part-time family.”

Tamera - former Brampton Academy pupil

OTHER PATHWAYS

Although the colleges and further education providers in Newham offer an extensive range of study options and facilities, you might be looking for a particularly specialised course that may be available locally or in a neighbouring borough. You can find out more about what is on offer at other education and training providers by visiting their websites, or contacting them directly through the details listed below.

GOING TO UNIVERSITY

Going to university gives you the opportunity to transform your life.

A university degree can provide entry to a wide range of careers and opportunities. Those who have degrees are also more likely to be in employment than those with lower level qualifications.

According to the Office for National Statistics, graduates will earn substantially more over their working life than non-graduates, so a degree can be considered a worthy investment.

In order to progress in specific careers, such as being a doctor, you will be required to study that subject, medicine, to degree level. An increasing number of careers and employers now require degrees (especially for senior roles). These include nursing, teaching and many computing and technical jobs.

At university, you can:

- **study a subject you love at a higher level and be taught by experts in your chosen field**
- **study in a global community of students bringing rich and varied experiences**
- **acquire and develop the higher level skills that are prized by employers**
- **enhance your personal development, skills and experience through internships, volunteering, working with researchers and studying abroad**

Start thinking about university now!

You will get many opportunities to find out about university while you are a student in Newham. Take every opportunity you can to visit campuses and get involved in summer schools, masterclasses and other activities. These experiences will all help you to gain a greater understanding of what studying at university is all about.

Choosing your subjects

It is important to know what the entry requirements for the university course you are interested in studying are. Requirements may vary between universities, but some courses, such as medicine, require you to have studied specific subjects.

There are some subjects preferred by selective universities. These are sometimes referred to as "facilitating subjects", which include:

- Maths and further maths
- English literature
- Physics
- Biology
- Chemistry
- Geography
- History
- Languages (classic and modern)

The table below provides some examples of the core Level 3 subjects you may need to apply for specific courses at university.

Suggested A level pathways which target admission to selective universities	Core A level subjects (students choose three subjects)	Facilitating subjects (students choose one subject)
Medicine/dentistry	Maths, further maths, physics, chemistry, biology	English literature, history, geography or a modern foreign language
Medical sciences	Maths, physics, chemistry, biology, psychology	English literature, history, geography or a modern foreign language
Veterinary science	Maths, chemistry, biology, English literature	English literature, history, geography or a modern foreign language
Biological sciences	Maths, chemistry, biology, psychology	English literature, history, geography or a modern foreign language
Physical sciences	Maths, further maths, physics, chemistry	English literature, history, geography or a modern foreign language
Maths	Maths, further maths, physics	English literature, history, geography or a modern foreign language
Engineering pathway	Maths, further maths, physics, chemistry	English literature, history, geography or a modern foreign language
Politics, philosophy and economics	Maths, English literature, history, economics	A modern foreign language or geography
Humanities	Students choose four subjects from the following: English literature, history, geography, religious education, a modern foreign language, psychology or biology	

For more information about choosing your subjects and entry requirements, have a look at Informed Choices, the Russell Group's guide to making decisions about your post 16 education.

The Russell Group represents 24 leading UK universities which are committed to maintaining the very best research, an outstanding teaching and learning experience and unrivalled links with business and the public sector.

University fees and finance – funding is available

Going to university costs money. You will have tuition fees to pay and you will need money for your living costs: things like your rent if you live away from home, money for food, travel, clothes and books and materials for your course. The good news is there are loans to help you with all of these costs.

Tuition fee loans

You will probably have seen in the news that students will pay up to £9,000 a year for undergraduate courses and most degree courses

last for three years. You do not have to pay these fees up front. Instead the Government, through the Student Loans Company, will provide you with a loan to pay your fees. The fees will be paid directly to the university for all eligible students.

Repaying your loan

Student loans have been designed to be manageable and realistic. You are liable to repay your loan in the April which falls three years after the start of your course, but you will only make repayments if you are earning more than £21,000. Once you earn more than £21,000, you pay 9% of your income above £21,000. For example, a graduate on a salary of £25,000 will pay £30 a month (9% of £4,000) from a monthly take-home pay of around £1,560 (take-home pay is the amount of money you get to take home and spend once tax and national insurance have been taken off).

You will pay interest on your tuition fee loan, and you need to be aware that the amount you owe will increase each year with interest. Interest is charged at the rate of inflation plus

3% while you are studying. If your repayments don't start because you're earning less than £21,000, the interest on your loan will increase at the rate of inflation.

Repayments are normally taken automatically from your salary, and monthly repayments are linked to your income and not the amount borrowed. If you haven't paid off the loan after 30 years, your loan will be written off.

Living cost loans

You can also get help with your living costs. If your family income is less than £42,620 per year, you will be able to get some help with your living costs in the form of a loan. You can also get living cost loans. Living cost loans are determined by your family income and individual circumstances such as whether you are studying in London or living at home.

Scholarships and bursaries

Each university will offer scholarships and bursaries and will have details of these on their website. Scholarships and bursaries do not have to be repaid.

Ieva Petrviciute

Ieva studied A levels in film studies (A), history (B) and psychology (A), and a Level 3 subsidiary diploma in TV and film production (D*). She is going on to study digital film production at the University of Greenwich.

"The teachers at NewVlc are very understanding and know what is best for me, challenging me to reach my full potential. I have learned so many things during my course that I am sure will help me in the future. I have also been involved in the NewVlc Dance Company and the Raleigh Programme. During my time at NewVlc, I have built up my confidence which has led me to doing great things such as work experience at MTV."

Rumana Ali, ex-Plashet School, ex-NewVlc 6th Form College.

Now studying at Oxford University.

Rumana achieved A levels in English literature (A*), government and politics (A) and history (A*) and an AS-level in economics (A). She is now studying history at St. Hilda's College, Oxford University

WHERE DO I START?

- List your qualifications or predicted grades, your skills and interests.
- Think about where you want to get to - what do you want to be doing in five years' time?
- How will you get there? What qualifications or training will you need?
- Research different courses.
- Research different education providers.
- Find out the application deadlines for courses you are interested in.
- Find out about open days and open evenings.
- Find out your current school deadlines for tutor references.
- If in doubt, ask!

WHERE TO GET ADVICE AND INFORMATION?

If you are at school

If you are in years 10 or 11, contact your school careers adviser or careers teacher. Or call 15billionebp on **020 8536 3631** and ask to speak to a careers adviser, who will be able to discuss your options with you.

If you are over 16

You can call Workplace on **020 3373 1101** if you are 16-18 to talk to an advisor about your options.

Contact the National Careers Service for more information, advice and guidance on careers and the qualifications and skills needed for them. Visit www.nationalcareersservice.direct.gov.uk for an online chat or call **0800 100 900** to speak to a careers adviser.

For more information on apprenticeship opportunities

Visit www.gov.uk/education/apprenticeships-traineeships-and-internships or talk to your school careers adviser to discuss your options.

To search for apprenticeship vacancies, go to www.gov.uk/apply-apprenticeship

- It is free to register and once you have set up your account you can receive alerts to tell you about new vacancies. For information and guidance visit

www.findapprenticeship.service.gov.uk/apprenticeshipsearch

where you can download:

- How to write a winning apprenticeship application.
- Progress your career with higher apprenticeships.
- Apprenticeship support guide.

Newham Workplace maintains a database of Newham residents aged 18 and over who are interested in finding out about apprenticeship opportunities. Register your interest with Newham Workplace by getting in touch with the engagement team. Visit www.newhamworkplace.co.uk/apprenticeships or call **020 3373 7891** or email engagement@newham.gov.uk Drop into the Stratford Office between 9.00am-5.00pm (Monday-Friday). Newham Workplace, 112-118 The Grove, Stratford, E15 1NS

For more information on traineeship opportunities

Traineeship opportunities will be advertised regularly on the National Apprenticeship Service website

www.gov.uk/apply-apprenticeship. For more information about traineeships visit www.gov.uk/find-traineeship

16-19 Bursary Fund

To find out more visit www.gov.uk/1619-bursary-fund/overview

Care to Learn – Help with your childcare while you learn

For more information visit www.gov.uk/care-to-learn or call the Learner Support Line on **0800 121 8989**.

Dance and Drama Awards

For more information visit www.gov.uk/care-to-learn
